Dual Master's graduate with 2+ years of experience and a strong interest in building impactful software and AI-driven applications.

WORK EXPERIENCE

SOFTWARE ENGINEER, PilProgram, Remote

(Feb 2025 - Present)

- Crafted UI/UX layouts in Figma for Pilprogram's web and mobile applications, and created React Native screens for the mobile app using Firebase (Firestore, Auth) for database and user authentication.
- Delivered responsive web interfaces for PilProgram's realtor platform, Parliamade, and integrated an AI-based property listing summarization feature using ReactJS, Tailwind CSS, TypeScript, Gemini AI, and Express.js

Tech Stack: Figma, ReactJS, Redux, NodeJS, TailWind CSS, Gemini AI, Firebase

SENIOR AI ENGINEER(Intern), Flow AI, New York

(Aug 2024 - Dec 2024)

- Built backend for Flow's corporate website end-to-end using Django, including designing the architecture.
- Enhanced user authentication and security by implementing OAuth 2.0 and JWT for secure API access
- Deployed a RAG-based model on Azure Kubernetes Service (AKS) and OpenAI to for filtering and ranking leads by relevancy and contactability, and designed RESTful APIs to serve results based on sales agent preferences.
- Mentored & managed 4+ new interns on the new workflows and technologies

Tech Stack: ReactJS, Django, NodeJS, Redux, Python, TailWind CSS, Selenium, OpenAI, Azure Cognitive Search, Pinecone, Jira

SOFTWARE ENGINEER, One Convergence Devices Pvt Ltd, Hyderabad

(Aug 2021 - Apr 2023)

- Improved time to readiness (TTR) for ML model deployment by 9% through frontend optimizations in MLOps platform DKube, enhancing render efficiency and state handling with ReactJS, TypeScript, and Redux Toolkit.
- Implemented a real-time monitoring dashboard in DKube using Prometheus and Grafana, enabling live tracking of GPU/CPU usage, memory consumption, and network metrics to improve workspace and pod performance visibility.
- Implemented CI/CD with Jenkins, automating Docker image creation and zero-downtime deployments on Kubernetes.
- Collaborated with cross-functional product and engineering teams to automate failure detection and unresolved workflow issues in DKube, reducing open issues by 40% (from 4K+ to 2.5K+) through automation.
- Actively participated in AGILE SCRUM methodology, engaging in key SDLC phases such as requirements gathering, analysis, design, development, and thorough testing.

Tech Stack: ReactJS, TypeScript, Python, Node.js, Express.js, Docker, Kubernetes, Linux, Jira, Unix/Linux, NoSQL, Redis, AWS

TECHNICAL SKILLS

Languages: Java, Go, Python, C, JavaScript, PHP, HTML, CSS, Shell Scripting, PowerShell **Frameworks & Libraries:** TensorFlow, Django, Flask, Scikit-learn, NetworkX, Keras, PyTorch, Hadoop, Langchain, ReactJS, TypeScript, Node.js, Ruby on Rails **Databases:** MySQL, MongoDB, PostgreSQL, DynamoDB, Pinecone **Technologies & Environments:** Unix/Linux, Windows, Docker, Agile Scrum, Kubernetes, Git, NoSQL **Cloud Platforms:** AWS Certified Solutions Architect, AWS Certified Cloud Practitioner, Azure

PROJECTS

Patient-Centric AI Health Assistant with Knowledge Graph (RAG) - Django, PostgreSQL, Langchain

(Aug 2024 - Nov 2024)

- Built a health-focused chatbot using OpenAI's LLM and Django, where patient data in PostgreSQL is used for interactions about their conditions and treatment plans.
- Integrated Neo4j for a knowledge graph, enabling efficient retrieval of patient-specific data. Leveraged Langchain and Graph RAG to dynamically query relevant information, enhancing response accuracy and continuity.

Textual Entailment in Clinical Trial Data - PyTorch, NLP, Hugging Face

(May 2024 - Jul 2024)

- Architected Multi-evidence Natural Language Inference using Clinical Trial Reports (CTRs) on breast cancer treatments using NLI4CT dataset and achieved an F1 Score of **72.34**.
- Finetuned **DeBERTa-v3** model on Numerical reasoning for LLMs, implemented Sebis Pipeline Model. The model retrieves evidence sentences and predicts inference. Experimented with different **LLMs** pre-trained on Biomedical NLI like **BioBERT**.

Personalized LinkedIn Bot using Gen AI - Selenium, Gemini AI

(Mar 2024 - May 2024)

- Engineered a personalized AI chatbot using Google's Gemini 1.0 Pro LLM and AI studio, fine-tuning the model with my WhatsApp conversations.
- Automated the bot to reply to comments on a LinkedIn post, mimicking my conversational style for public interaction.

RAG based Chatbot - Langchain, Pinecone, AWS

(Feb 2024 - Apr 2024)

- Developed an end-to-end RAG-based chatbot using OpenAI's GPT API, Flask (Python), and LangChain for orchestrating prompts and backend logic, Pinecone vector database for retrieval.
- Built a responsive frontend using TypeScript and React, optimizing for cost efficiency and performance through controlled API usage and lightweight client-server communication.

EDUCATION

University at Buffalo (SUNY) - (2023 - 2024)

Masters in Computer Science (AI/ML track)

Award: Winner of UB AI hackathon by Blackstone Launchpad for creating an end-to-end RAG based AI solution

University of Hyderabad - (2017 - 2022)

Integrated Masters in Technology, Computer Science

Publication: Opinion Maximization in Signed Social Networks Using Centrality Measures and Clustering Techniques

Honor: Best Student Paper at 19th International Conference on Distributed Computing and Intelligent Technology
